Kotdwara, Uttarakhand

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript
AI & Data: LLMs, RAG, OpenAI API, Pandas, NumPy
Backend: Django, Flask, Node.js, RESTful APIs, JWT
Frontend: React.js, HTML5, CSS3
Databases: PostgreSQL, MySQL, MongoDB
Cloud & Tools: AWS, Hostinger VPS, Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

HyperBloom

Dehradun, India

Founder

2025 – Present

- Founded HyperBloom, a startup providing digital solutions to educational institutions including custom web platforms, management systems, and AI-powered tools.
- Leading end-to-end product development, client acquisition, and deployment of scalable SaaS products for schools, colleges, and universities.
- Delivered institutional-grade platforms (GateFlow, PaperFlow.ai) currently in active use across multiple universities in Uttarakhand.

Self-Employed

Remote

Freelance Full Stack Developer

2023 – Present

- Designed and developed modern e-commerce, restaurant, jewelry, perfume store, and portfolio websites for multiple businesses and startups.
- Delivered responsive, SEO-friendly, and conversion-focused web applications with payment gateway integration and WhatsApp automation.
- Managed deployment and hosting of production applications using Hostinger VPS and modern deployment workflows.

Ethara AI

Remote

Machine Learning Intern

Jan 2026 – May 2026

- Built Python-based data processing pipelines using Pandas and NumPy for analysis of 50,000+ records.
- Developed predictive machine learning models achieving 92% accuracy and improving automation efficiency by 30%.
- Collaborated with cross-functional teams to present insights and improve business decision-making processes.

Freelancer.in

Remote

AI/ML Developer (Contract)

Feb 2026

- Delivered an Indian market stock prediction system using LSTM neural networks and technical indicators (RSI, MACD) within client budget and timeline; received **5.0/5.0** client rating.
- Applied Markowitz mean-variance framework for portfolio optimization; benchmarked against buy-and-hold baseline, achieving closing price MAE of ~2.3%.
- Completed paid engagement with full client sign-off on project scope and deliverables.

PROJECTS

RAG Evaluation CI/CD Pipeline | Python, Groq API, TF-IDF, Streamlit, GitHub Actions

Apr 2026 – Jun 2026

- Built a production-grade RAG evaluation pipeline using LLM-as-a-Judge scoring via Groq API across 4 metrics: Faithfulness, Answer Relevance, Context Recall, and Semantic Similarity.
- Integrated CI/CD quality gates via GitHub Actions to automatically block pull request merges when any retrieval metric falls below 4.0/5.0, enforcing quality standards on every commit.
- Developed an interactive analytics dashboard with run comparison, metric trend history, and per-question retrieval inspection to systematically debug RAG pipeline failures.

COER GateFlow – Campus Entry Management System | Django, PostgreSQL, MSG91, Python

Nov 2025 – Apr 2026

- Architected and deployed a campus-wide access control system serving **800+ active users** with 2,000+ daily interactions via encrypted QR-code verification, achieving **99.9% uptime**.
- Integrated MSG91 SMS API for real-time entry/exit notifications; built an administrative dashboard for access log monitoring and anomaly detection.

PaperFlow – Automated Exam Paper Generator | Django, Python, JWT, PostgreSQL

Dec 2025 – Jan 2026

- Developed an automated exam paper generation system producing 500+ unique papers with role-based access control and support for high-concurrency faculty requests.
- Engineered an isolated PDF generation engine that reduced exam paper preparation time from **5 hours to under 10 minutes**, eliminating manual formatting bottlenecks.

RasoiFlow – Restaurant POS & Management Platform | *Python, PostgreSQL, React.js, Hostinger VPS*

- Developed a complete restaurant POS and management platform currently used by 6 restaurants.
- Implemented order management, billing systems, inventory tracking, analytics dashboards, and role-based staff management.
- Designed scalable backend APIs and optimized PostgreSQL queries for real-time restaurant operations.
- Planning SaaS-scale expansion with multi-branch support and cloud-native deployment architecture.

EDUCATION

College of Engineering Roorkee (COER)

B.Tech in Information Technology

Roorkee, Uttarakhand

2022 – 2026

CERTIFICATIONS & ACHIEVEMENTS

- IBM AI Foundations for Everyone – Coursera (2024)
- Machine Learning Specialization – Krish Naik
- Secured **Rs. 80,000+** in sponsorships while leading the Fest Team at COER University.

LEADERSHIP & EXTRACURRICULAR

- Finalist, Smart India Hackathon 2025 – developed an AI-powered solution, competing at the national level.
- Led sponsorship and technical coordination initiatives for university-level events and hackathons.
